

HARBOUR MASTERS NOTICE

NOTICE 1 of 2022

Upgrade & Maintenance Works to Dock Gate

A programme of works to the dock gate, hydraulics and operating system will commence on 5th May lasting until mid-July. A works compound will be established on South Pier and access across the dock gate restricted. Access to the office and user facilities will be via the pedestrian walkway on the North Arm.

During this works programme there will be periods when the gate will remain in its raised position, preventing the movement of vessels for up to 7 days to and from the Inner Harbour (Wet Dock). Additionally, there will be some diving operations restricting access over high water periods. Such periods will be promulgated to users via further Notices when the programme is confirmed. We will endeavour to minimise such periods wherever possible.

It is not planned, at this time, for the wet dock to go tidal for any periods.
