

## **HARBOUR MASTERS NOTICE**

### **NOTICE 18 of 2022**

### **Electricity Price Increase Penzance Harbour.**

As you will all be very aware the cost of utilities, especially electric, has risen dramatically over the past few months. Cornwall Council was in a very fortunate place whereby they had pre purchased electric at a set rate and this was passed across to yourself as the consumer. Unfortunately, this has now come to an end, as of 1<sup>st</sup> October 2022.

We are now having to rise our prices of electric from 16p per unit to 34p per unit. I know this is a huge increase but sadly this is in line with the price we buy it in at. We do not make a profit on the electric and we offer it to yourself at the price we buy it in for.

These changes will take immediate effect and the prices will be increased on the Rolec top up machines.

I apologise for this increase, but these price rises are beyond our control.
