

PENRYN HARBOUR NOTICE TO MARINERS Notice No. 3 of 2026

Adverse Weather – Securing of Vessels

Vessel owners and mooring holders are advised that adverse weather is forecast and are requested to take appropriate precautions to ensure their vessels are adequately secured.

Owners and operators should, where it is safe to do so, check their vessels in advance of the expected conditions and ensure that:

- **Mooring and berthing lines** are suitable, in good condition and of adequate strength.
- **Sufficient lines are provided** for the anticipated conditions, including additional lines where appropriate.
- **Lines are correctly positioned and protected against chafe** where necessary.
- **Fenders** are suitably positioned and secured.
- **Loose equipment, covers and other items on deck** are properly secured.
- **Bilge pumps, batteries and other essential equipment** are checked and operational, as appropriate.
- **Appropriate vessel insurance** is in place and remains valid. Owners are encouraged to take this opportunity to check that their policy has not lapsed and that the cover remains appropriate for the vessel and its mooring or berth.

Particular attention should be given to vessels which may not have been inspected recently.

Vessel owners should not put themselves or others at risk by attempting to access or adjust vessels during severe weather conditions.

Anyone with concerns regarding any vessel, within the harbour should contact **Truro Harbour Office** for advice and assistance.
