Cornwall Harbours Board and Harbour Authority

In 2023 the Cornwall Harbours Harbour Revision Order was made bringing together all of Cornwall's Municipal Harbours under one legal structure. Through an MOU, with Cornwall Council, Cornwall Harbours Board was formed in September 2023. Cornwall Harbours Board, a Harbour Management Committee, is responsible for the operation of all of the municipal ports and harbours in Cornwall which includes Bude, Newquay, Portreath, St Ives, Penzance, Prince of Wales Pier (Falmouth), Penryn, Truro, Portscatho and Portwrinkle. Other assets that the Maritime Service are responsible for include Saltash and Downderry.

Cornwall Harbours Board consists of 12 members, with six being Councillors and six Independent Board members who are appointed following a skills audit. There are also non-voting, co-opted members, who are stakeholder representatives, appointed to it. Cornwall Harbours Board reports to the Full Council who are the Duty Holder.

Our harbours are of a varying size and operation, with some offering commercial facilities and others more related to the fishing industry or leisure market. The principle of the Harbour Revision Order is to create a self-sustaining portfolio of harbours. Our harbours are financed through income generated within the boundaries established in the Harbour Order of each harbour. Any surplus generated across the harbours is deposited into a reserve account that is ring fenced, meaning this can only be spent within the statutory harbour areas.

For more information on Cornwall Harbours Board, including regular news updates please see: **www.cornwallharbours.co.uk**

Ports and Marine Facilities Safety Code

The Ports and Marine Facilities Safety Code sets out a national standard for every aspect of port and marine facility safety. Its aim is to enhance safety for everyone who works in, or uses, ports, harbours, marinas and other marine facilities.

The Code should be read in conjunction with its companion Guide to Good Practice on Port Marine Operations. Copies of both the Code and the Guide are available on the Department of Transport website.

The Code is based around 10 key measures identified as critical to the management of port and marine facility safety, which we are audited against.

	**1**	**Duty Holder**: whose members are typically, individually and collectively, accountable for compliance with the Code, and their organisation's performance in ensuring safe marine operations
	**2**	**Designated Person**: provides independent assurance about the operation of the organisation's marine safety management system and must have direct access to the Duty Holder.
	**3**	**Legislation**: the Duty Holder must be aware of and review the organisation's legal powers, duties and responsibilities based on applicable local and national legislation and seek additional powers if necessary to improve marine safety.
	**4**	**Duties and Powers**: organisations must comply with any statutory duties and responsibilities they have.
	**5**	**Risk Assessment**: organisations must ensure that risks are formally assessed and are eliminated or reduced to the lowest possible level, so far as is reasonably practicable, in accordance with good practice.
	**6**	**Marine Safety Management System**: organisations must operate an effective MSMS which is based on formal risk assessment.
	**7**	**Review and Audit**: organisations must review and audit performance against applicable requirements of the Code.
	**8**	**Competence**: organisations must use people who are appropriately trained, qualified and experienced to manage marine safety.
	**9**	**Plan**: organisations must publish a marine safety plan showing how the standards in the Code will be met and produce a report assessing performance against that plan at least every three years.
	**10**	**Conservancy Duty**: organisations must ensure their facilities are fit for purpose and have a duty of reasonable care to ensure that any vessel can utilise them safely.

A copy of our annual report and more information regarding our audit results can be found on the Cornwall Harbours Website:
https://www.cornwallharbours.co.uk/document-centre/

Port of Truro

The Port of Truro is 2,500 acres in size and has a significant number of leisure moorings together with visitor's pontoons and quays.

There are 1,500 moorings within the Port of Truro, these consists of deep water and tidal moorings, some which are managed by us, meaning the owner has no maintenance responsibilities. We also have approximately 150 beach berths at Malpas Road and Sunny Corner in Truro.

The Port offers commercial moorings on the River Fal for vessels up to 190m in length and boats can be craned in and out of the water at Lighterage Quay.

Port of Penryn

The Port of Penryn, a statutory Harbour Authority of approximately 100 acres in size, is located in the western part of the Fal Estuary. The Port of Penryn has over 400 moorings comprising of pontoons, swinging moorings and beach berths. There are also 3 marinas and a number of other mooring providers located within the port.

Penryn has shore accessed pontoons as Exchequer Quay and Ponsharden.

Exchequer Quay at Penryn is available for loading ship stores or other commercial equipment.

Prince of Wales Pier

The Prince of Wales Pier is a pier situated within Falmouth Inner Harbour with its own local legislation. It is used by ferries, trip boats, small fishing vessels and local leisure craft. It is approximately 150 metres in length with a solid and suspended section incorporating six sets of landing steps with a further set in the small dock.

The Pier in Falmouth is a central hub year-round ferry services to Flushing and St Mawes as well as seasonal tripping boats going up the River Fal and to the Helford Estuary. It is also a tourist attraction in its own right with events that take place on it together with those simply taking a walk along it. The inner basin on the Pier is a safe haven for visiting dinghies (tidal restrictions apply).

Visitors Moorings

A variety of visitor moorings are available, together with sheltered anchorages. There are four detached visitors' pontoons on the river, these can take vessels up to 18m. Our Marina at Malpas offers short term visitor moorings for boats or tenders. The wall berths on the Upper Quays in Truro are available for short term visitors and long-terms stays.

Public Slipways

Small craft can be launched from public slipways at Malpas, Sunny Corner, Mylor, Boscawen Park and Ponsharden.

WILDLIFE BEST PRACTICE

In order to safeguard and continue enjoying the wildlife we share our coastal waters with, it is important that we all adopt best practice to minimise any disturbance our boating activities may cause.

IF APPROACHED
If approached by wildlife maintain a steady course or remain stationary. Let wildlife decide when to leave

PROTECTED?
Contact the local Wildlife Trust & find out if the area you are visiting has protected habitats & wildlife

TIMING
View for up to 15 mins then move away slowly

DISTANCE
Keep a distance of 100m / 300ft or more when viewing

SLOW DOWN
Less than 5 knots or no-wake speed

BE PREDICTABLE
Avoid erratic movements & maintain a steady course

KEEP QUIET
Avoid revving engines & speak quietly to see more

INVASIVE SPECIES REMOVAL

Aquatic invasive plant and animal species can cause damage to your PWC and equipment, disrupt your boating activities and harm our local environment. To ensure we do not introduce or spread them round our UK waters follow these steps every time you recover your PWC:

CHECK
for any visible biofouling on your craft, remove & dispose of in the bin

CLEAN
your craft, equipment, clothing and trailer as well as flushing the engine with fresh water to remove hidden biofouling

AIR DRY
your craft, equipment, clothing & trailer for as long as possible. Species can survive several weeks in damp conditions

Truro Tidal Barrier

To alleviate flooding in Truro, the Environment Agency installed a tidal barrier at the northern end of Lighterage Quay. In 2024 the flood gates were replaced led by construction company Kier. The projected consisted of new mitre gates, control systems, hydraulics and control tower. The project also saw the installation of a silt clearance system and improved fendering.

The structure is marked by lateral lights both upstream and downstream. When tide levels are expected to reach or exceed 5.4m (Falmouth Datum) the gate will be close by single pair of mitre gates. The gates operation may be owing to astronomically predicted tides, meteorological surge or a combination of both.

The gates will generally be closed to all traffic for a period of up to 2 hours 20 minutes before and after high water but the actual duration of the closure will vary, depending on the quantity of rainfall run off expected in the rivers Kenwyn and Allen. During periods of closure the water level upstream of the barrier will slowly rise owing to the inflow of water from rivers Kenwyn and Allen, however it will not be less than 4.3m (Falmouth Datum).

Three flashing red traffic control signals indicate the barrier is closed.

Environment Agency Incident Hotline 0800 807060

Use of Liquified Petroleum Gas (lpg) on Pleasure craft – explosions, fires and accidents resulting from gas leaks

- Fire, explosion and asphyxiation are the possible dangers from LPG use on vessels due to leakage of gas, defective fittings, flame failure or inappropriate installation.
- Gas is heavier than air and may accumulate in bilges and other non- ventilated spaces. Even without ignition it may asphyxiate occupants of vessels.
- Gas canisters and bottles should be stored in lockers that are ventilated to the outside in case of leaks, preferably on deck. Provision of an automatic gas detector and alarm is advised.
- All piping leading into the vessel should be approved rigid copper or stainless steel tube construction with appropriate fittings. Necessary flexible lengths of tubing should be as short as possible and comply with the appropriate British Standard.
- There are a number of issues regarding solid fuel stoves which boat owners should be aware of including the risk of carbon monoxide poisoning and the potential for fire caused by the significant heat thrown out by these appliances. You are advised to seek advice from the very useful website **www.boatsafetyscheme.org/**

Stay Safe on how to avoid fires afloat and how to make your own fire action plan.

CORNWALL
FIRE & RESCUE SERVICE
A service of Cornwall Council

Preventing fire

Fit and test OPTICAL smoke and carbon monoxide alarms.

Ensure fuel-burning appliances, engines and generators are properly installed, maintained and ventilated.

Never use a barbecue or outdoor cooking appliance inside a vessel or enclosed cockpit.

Check gas and fuel systems regularly. Turn off cylinders and fuel supplies when not in use.

Keep escape routes clear and flammable materials away from heat.

If a fire breaks out

Scan to download the free app

Raise the alarm and get everyone off the vessel as soon as it is safe to do so. Call 999 and ask for Fire and Rescue and Coastguard. Give your location using what3words or nearby landmarks. Know your vessel's location in advance.

Alert nearby vessels.

Carbon Monoxide – The Silent Killer

Carbon monoxide (CO) is an odourless, poisonous gas produced by fuel-burning appliances, engines and generators. Fit a CO alarm meeting BS EN 50291-2 and ensure appliances are properly maintained and ventilated.

Concerned about a vessel?

Worried about fire risks, unsafe living conditions or the welfare of someone living aboard a vessel? Falmouth Fire Station can offer fire safety advice and help identify appropriate support.

Non-emergency concerns:

t: 020 3162 2240 e: falmouthwholetime@fire.cornwall.gov.uk

Immediate danger? Call 999.

Love the Estuary? Let's Protect It

The Fal and Helford Special Area of Conservation (SAC) boasts a range of internationally important habitats, including seagrass meadows, maerl beds, and native oyster reefs, and is home to a wealth of marine wildlife. These habitats and species make the area so special, but they are also vulnerable and need our protection.

Boaters

Reduce your speed and avoid anchoring in voluntary no-anchor zones

Follow the Environmental Code of Practice and RYA The Green Blue guidance

Avoid discharging sewage and use the Falmouth Harbour Black Water Facility instead

Make use of waste and recycling facilities in the harbours you visit

Fishing

Follow local bylaws and dispose of fishing tackle responsibly

Pollution

Report pollution on land or entering the water, call the Environment Agency's 24-hour incident hotline: 0800 807060

Report a pollution incident at sea, contact the Coastguard on 01326 317575

Find out more about the SAC and stay up to date with us

Antifouling Initiative

ENVIRONMENTAL BEST PRACTICE

PROTECT THE ENVIRONMENT

- Choose the right paint & work in a well-ventilated area
- Protect the ground and surrounding area
- Minimise paint dust by wet sanding

COLLECT PAINT DEBRIS

- Place tarpaulins under the vessel
- Use an industrial vacuum-cleaner linked to the paint scraper
- Capture old paint with 'paste-and-peel' techniques

DISPOSE OF WASTE

- Clean up and dispose of all hazardous waste correctly

Falmouth Yacht Services

RUSTLER YACHTS

PART OF Rustler YACHTS

When it comes to repairing your boat, you need a yard who you can rely on to carry out a superb standard of workmanship and be easy to deal with. Who better than the people who build the world-renowned Rustler Yachts?

Here at Rustler Yachts, we offer a full refit and repair service to any make of boat, be it motor or sail, covering every aspect of maintenance including:

- Engineering
- GRP repairs
- Electronics
- Electrical installations
- Osmosis treatment
- Coppercoat
- Blasting
- Insurance work
- Heating systems
- Servicing of engines
- Valeting
- Rigging
- Sails and canvas work
- Plumbing
- Painting/Spraying
- And absolutely anything else!

"David, thank you so much for just being EXCELLENT and doing all the work so well and quickly. You, James, Barney have been fantastic...a total pleasure." Thank you. Mr & Mrs C – Nimbus 38

To discuss any work please contact us on 01326 310120
or email fys@rustleryachts.com
We would love to talk to you!

Speed limits for the Fal Estuary

Six tips for a safe trip, remember IT'S WET

Inform: Tell others where you are going.
Tides and Weather: Check before you go.
SOS: Carry a means of calling for help.
Wear a Lifejacket: Useless in the locker.
Engine and Fuel: Check fuel and engine.
Training: Essential for you and crew.
